CAASTRO IN THE CLASSROOM 2017

FREE video conferencing for Australian schools

Connect your students with a CAASTRO scientist via video conferencing for a curriculum-focused presentation or interactive Q&A session.

FREE live streaming events

Join thousands of students to watch a live presentation by a world-class research scientist, with content linked to the Australian Curriculum.

FREE online resources linked to the Australian Curriculum

Hands-on activities, curated online content, animations, recordings of past presentations, and more, developed by classroom teachers and CAASTRO astrophysicists.

ARC Centre of Excellence for All-sky Astrophysics (CAASTRO)

By answering fundamental questions about the nature of the Universe, by developing innovative ways of processing enormous data-sets, and by providing a diverse set of opportunities for students and young researchers, CAASTRO aims to establish Australia as the world-leader in wide-field astronomy. CAASTRO is uniting the world's top astronomers in a focused collaborative environment and is changing the way we understand the Cosmos.

'CAASTRO in the Classroom' is presented in collaboration with the New South Wales Department of Education and is supported by the Commonwealth Government through the Australian Maths and Science Partnership Program.
